FOR IMMEDIATE RELEASE

US MOTION COMPLETES MOVE TO NEW FACILITY

Relocation Provides Ample Space for Future Expansion

Liberty Lake, WA -- Sep 24, 2007

US MOTION Inc. today announced that it has completed its relocation into its new headquarters in Liberty Lake, Washington. The new 19,000 sq ft building, which includes both office and manufacturing space, has enabled the company to consolidate its operations into a single facility.

Shaun Gomez, Manufacturing Manager for US MOTION, emphasizes: "For some time now, we have been in need of additional space to meet the growing needs of our customers. The new facility not only allows for current and future expansion, but also furthers our efforts to create a lean manufacturing environment focused on flow and efficiency."

In addition to office and manufacturing areas, the new US MOTION headquarters contains a state-of-the-art machining facility, two laboratories and specialized rooms for engineering, systems integration and production. With easy access to the I-90 freeway, the new facility is situated in the heart of the Spokane / Coeur d'Alene technology corridor.
